Date Issued: March 29, 2023

The following information is provided in accordance with the California Safe Drinking Water and Toxic Enforcement Act of 1986: Proposition 65.

Dear Customer,

The voters of California enacted by referendum the “Safe Drinking Water and Toxic Enforcement Act of 1986,” commonly known as Proposition 65. This law states that businesses may not “expose any individual to a chemical known to the state to cause cancer or reproductive toxicity without first giving clear and reasonable warning.”

Chemicals commonly used in manufacturing processes for medical device products and material constituents in medical device products and their packaging are included in the list of chemicals that by this law, require clear and reasonable warning. ASAHI INTECC products are covered by Safe Drinking Water and Toxic Enforcement Act of 1986. All of ASAHI INTECC products comply with the standards established by FDA and our own internal standards for safety, efficacy and labeling information.

We are providing the Proposition 65 required warning to you by means of this correspondence. Please assure that anyone who may come in contact with these products is advised of this warning. If you have any questions, please contact your local ASAHI representative, or contact ASAHI customer service at 855-286-9473 or customersupport@asahi-intecc.com. For questions regarding compliance or general questions on Proposition 65, please contact the California Office of Environmental Health Hazard Assessment at 1-916-445-6900 and www.P65Warnings.ca.gov.
